» Profile

Senior Frontend Developer with 8+ years of experience building responsive web applications, CMS platforms, dashboards, and hybrid mobile experiences. Strong focus on Angular, TypeScript, JavaScript, and reusable UI components. Recent work includes government-service applications using Form.io and shared, JSON-configurable frontend libraries for reports and data views. Experienced in translating UI/UX designs into maintainable interfaces and collaborating with backend and cross-functional teams.

» Experience

Comprehensive Technology Company, Riyadh / Remote — *Senior Frontend Developer*

AUGUST 2022 - PRESENT

- Developed and maintained Angular frontend solutions for government-service workflows and Form.io-based applications.
- Built shared frontend libraries for reports and data views, with UI behavior configured through JSON.
- Designed reusable UI solutions intended for use across projects, reducing the need to reimplement similar display patterns.
- Delivered bilingual (Arabic / English) interfaces with RTL support for government-service applications.
- Worked with application data and backend services to deliver configurable interfaces for government-service projects.
- Contributed to frontend architecture and shared-library decisions, balancing reuse with project-specific requirements.

Roaa Tech, Dubai — *Senior Frontend Developer*

JUNE 2021 - SEPTEMBER 2022 - www.roaa.tech

Roaa is an Information Technology company specialized in receiving IT outsourced management and producing online services.
